Elmbridge Model Club: Air Section**GENERAL RULES**

1. All members must follow the BMFA Safety Code and Operational Guide as laid down in the current BMFA Members Handbook.
2. Flying can only take place when a Duty Officer or Key Holder is present.
3. The Duty Officer or Key Holder will be responsible for safety, noise and for compliance with these codes of practice. His word shall be final on these matters. If the weather is unsuitable for flying the Duty Officer or Key holder may close the field.
4. No one may fly unaccompanied under any circumstances.
5. All learners must be accompanied and assisted by a member who holds an "A" or "B" BMFA proficiency certificate for the same class of model (e.g. fixed-wing, helicopter).
6. "A" and "B" certificate holders, by nature of their competence, may fly at any time without other flyers being present provided that they are accompanied. The accompanying person does NOT have to be a flyer, but must be a responsible person able to summon help if necessary.
7. No model may be flown which produces a noise level, in any direction, exceeding 80dBA measured at 7 metres using the procedure laid down in the BMFA Handbook. Each model must be tested for noise before it may be flown. A test pass certificate will be issued recording details of the model and the date. Certificates will remain valid for no more than 12 months. The model will be assigned to one of the following noise bands:
 - Band A: up to 70 dBA
 - Band B: 77 - 78 dBA
 - Band C: 79 - 80 dBA.
8. If a member alters a model in any way which would invalidate its noise banding (for example, by using a different propeller size) then he must have it re-tested. Details of each model and its noise measurements will be recorded for the information of other members and so that the Duty Officer or Key holder- can check for out of date certificates and model alterations.
9. The Duty Officer Key Holder is empowered to ensure that a model has a valid noise certificate, to re-test any model and ground any model which he considers produces excessive noise when airborne. The affected member may appeal at the next Sub-committee meeting.
10. Models in noise band C may be restricted to shorter flying times than models in band B, and so on. Such band restrictions will be decided periodically by the Sub-committee and notified to members in the Club Newsletter.
11. A current E M C membership card must be worn as proof of entitlement to fly.
12. **Only frequency channels 60-85 on the 35 MHz band may be used.** Frequencies 55-59 and 86-90 are not to be used at this site under any circumstances, as agreed with another private club a few miles away.
13. The use of 27 MHz band R/C equipment is not permitted for model aircraft at any club site.
14. Every transmitter must have a pennant showing the crystal fitted.
15. Before transmitting, members must place a peg marked with their name, on the corresponding channel of the frequency board. Members must also call out their channel number before switching on. If two or more members are sharing the same frequency, each must remove his peg immediately on clearing the channel. No member may remove another member's peg unless the owner either clearly gives his consent or is not present.
16. Transmitters must only be operated in the immediate vicinity of the pits or landing strip and never in the car park or out on the field, for example when retrieving a model.
17. Members must alert other pilots and satisfy themselves that it is safe and considerate to take off or walk onto the strip. Pilots must call out "dead stick", "landing" or "low pass" as a clear warning. "Low pass" must be accompanied by the direction of the pass i.e. "Left to Right". Pilots calling "dead stick" have priority. Members must vacate the strip as quickly and safely as possible after take off and after landing. Pilots are advised to stand close together in the pilot box, so that they are able to easily communicate their intentions to fellow pilots.
18. A member bringing guests to the field is personally responsible for their control and safety awareness. Guests may only fly at the Duty Officer or Key Holder's discretion.
19. No flying is allowed while mowing, etc is in progress on the strip or the field, without the permission of the person working.
20. Tow or bungee launching may only take place at the Duty Officer or Key Holder's discretion. Launching can take place from the most suitable position, clear of the power aircraft pits. All power flying must stop. The launch point becomes the new operating area.
21. When starting and running up motors, members must ensure that the propeller faces outwards from the pits and, preferably, away from the flight line. Never let a propeller point at another person while it is running. An electric model must be handled as if it is at full power whenever its flight battery is connected.

22. Models, including hand launched models, must not be flown or taxied into or out of the pits and must only be released on the strip. Helicopter rotors must not be run up in the pits.
23. All new flyers must ensure that they have a safety briefing from a member of the Sub-committee, before they do any flying.
24. Members must not leave rubbish or litter in the field and are each responsible for keeping the field clean and tidy.
25. Any member who breaks these codes of practice will be disciplined by the Sub-committee which has the power to impose a flying ban.
26. No pets are allowed in the pits and/or strip area.
27. **Mobile phones must not be used in the pit area.**

These Rules may be amended, or added to from time to time, and the decision of the Committee as to their application and interpretation is final.

RULES FOR CHAPEL FARM, RIPLEY

1. Chapel Farm Model Centre, Ripley is Elmbridge Model Club property. Every member has a duty to protect and respect this asset. Flyers in particular must ensure that their activities do not risk losing the use of the site for our chosen sport, by flying safely, quietly and with consideration to others at all times.
2. Members may fly power models on:

WEDNESDAYS & FRIDAYS	10:00-19:00
SATURDAYS	10:00-17:00
SUNDAYS	10:00-16:00
3. Members may fly gliders or electric models FROM Dawn till Dusk on:
WEDNESDAYS, FRIDAYS, SATURDAYS, SUNDAYS and any BANK HOLIDAY MONDAY.
All applicable rules apply.
4. Parking is allowed only in the area designated on the plan. No member may drive to the strip or pits without express section committee permission.
5. The pits are designated by a mown area and positioned as shown on the plan. Under exceptional wind conditions they may be moved by the Duty Officer or Key Holder. Only one pit area may be used. All pilots should still stand in the pilot box.
6. All flying must take place within the airspace above the area as shown on the plan. This area ensures safety over the entrance, car park and pits and avoids disturbance to our neighbours. Over-flying bordering roads and properties must be avoided. The airspace may be further restricted by the Duty Officer or Key Holder according to conditions or circumstances on the day.
7. A pilot, however experienced, must adjust his flight pattern if requested by the Duty Officer or Key Holder. Instructors of trainee pilots must be particularly vigilant to prevent models wandering outside the permitted zone.
8. If a model has to be retrieved from neighbouring land, this must be done as quickly as practical and the permission of the landowner must be sought whenever possible. Such incidents must be reported to the Duty Officer or a Sub-committee member.
9. Members must minimise any damage to crops or hay and keep to paths whenever practical.
10. Before taking off, pilots must ensure that they will not cause the following limits of airborne models to be exceeded:
 - a) Three fixed wing models and/or circuit helicopters plus
 - b) Two hovering helicopters.
11. These limits may be reduced (**but not increased**) at the discretion of the Duty Officer.
12. All ordinary members must leave via Rose Lane.

DISCIPLINARY PROCEDURES

1. Any member who breaks the Rules of the Aircraft Section Codes of practice, shall be brought to the attention of a Sub-committee meeting. The member shall be given the opportunity to explain his actions if he wishes. The Sub-committee shall then ask the member to leave the room whilst it considers the case. Where appropriate, the sub-committee shall award penalty points which can mean a flying ban depending on the nature of the offence and the former conduct of the member. The penalty points scheme shall operate as follows:
 - The penalty points of each offence shall have a life span of 24 months from the time of award.
 - If the member then has a total of 10 or more penalty points, he shall receive an immediate three month flying ban.
 - On completion of a ban period, the member's points shall return to 9 points.

- No banned member may at the same time be a Sub-committee member.
- 2. The number of penalty points awarded shall depend on the seriousness and circumstances of the offence.
- 3. Matters of general discipline are the concern of the main Committee and are not covered by the points scheme. The Sub-committee may also refer any offence, particularly serious offences, to the Main Committee.
- 4. **This disciplinary procedure shall apply to all members.**

Elmbridge Model Club: Air Section**CONTROL-LINE RULES**

1. Always use steel lines of sufficient strength for the type of model. Where possible, stranded lines should be used and should always be used when flying over grass, or when the model is going to be manoeuvred.
2. Use swivels between the handle and the line whenever suitable and always when the model is to be subjected to unrestricted manoeuvring.
3. Before each flight, the model should be subjected to a pull test of at least 10 times the model's weight.
4. Check lines and linkages after the pull test and if any damage has ensued, DO NOT FLY until the damage has been rectified and satisfactorily re-tested.
5. Ensure before the model is released that there are no spectators or parked cars adjacent to the circle.
6. Whenever high pulls are expected, use a safety strap connecting the handle to the wrist.
7. Never release the model whilst it is flying.
8. Encourage spectators to stand upwind of the circle.
9. Always mark a centre spot for your circle, ensuring that the adjacent circles are not too close to each other.
10. Always stay on the centre spot when flying.
11. If someone strays into the circle whilst you are flying, fly high to avoid them, cutting your engine if possible.
12. Always ditch your model rather than risk hitting someone.
13. The bell-crank pivot is to be connected to the engine crankcase by heavy LAYSTRATE wire (7 strand) so that, in the event of crash damage, the engine, if broken away from the airframe, is still connected to the bell-crank and does not become a separate travelling mass weight.

These Rules may be amended, or added to from time to time and decisions of the Committee as to their application and interpretation is final.
